## Community Input Form

The development of the FY2012 budget requires an understanding of the priorities of the community, an analysis of what the City can afford and the focused allocation of our resources. Discussion of the community's priorities gives a sound foundation for budget choices. With the community in mind, the Community Outreach Program for the FY2012 Budget development provides specific opportunities to listen and learn.

Community members are invited to a series of meetings with the City Manager during late February and early March. You are also welcome to submit written comments, which will be collected and compiled for input to the budget process. Please use this form to share with us your comments and suggestions for possible efficiencies and savings throughout the City. You do not need to include your name on this form. You may also provide your comments on the Community Input Form located on [www.norfolk.gov](http://www.norfolk.gov). On this site, you can read comments and suggestions left by others.

Topic/Subject: (i.e. cost savings, changes in services, revenue ideas)
